Group Security Officer, Systematic

Shehzad Ahmad

Head of Information Security, Nets

Ken Bonefeld

CISO, Norlys

The role of cyber security managers requires leadership and business acumen capabilities to engage crucial stakeholders on the cybersecurity agenda. It has become an increasingly complex role of managing politics, stakeholders, corporate reporting games, and building and nurturing diverse teams.

Leading and building teams

The course focus on strengthening participants' ability to lead upwards and outwards, defining strategies for driving organizational change, while maintaining team performance. In addition, participants will address the importance of building and developing teams of extremely focused and different specialists in a competitive market for talent.

Customized program by real cyber-industry leaders

With a customized program, developed by leaders from the information security industry, participants are taken through lectures and real-life cases. Active participation is required during 8 full-day modules stretching over 12 weeks, in order to pass the course.

CISL Winter 2023

January 10 & 11, 24, February 7, 28, March 14 & 15, 28.
